Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v14.4.51 (08/25/2020)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

VisTracks login enhancements

(FEL-510)

Drivers will now be able to log in to VisTracks and run ELD successfully even if VisTracks servers are unavailable for sync. Previously, drivers could not log in to VisTracks if its servers were unavailable.

TrackIt Android responsive

(FEL-699)

The previous TrackIt Android v14.4.49 release caused the TrackIt Android application to stop responding in some instances. With this update to the release, the application will be fully responsive.

Consistent odometer data sent to VisTracks

(FEL-663)

TrackIt Android will now always send the most accurate and recent odometer values to VisTracks. Previously, some situations occurred in which the odometer values sent to VisTracks were significantly different than the actual odometer values.
