

TrackIt[®]

Android

Version: 14.4.52

Release Notes

09/08/2020

**Command
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the TrackIt Android product.

Legend

Enhancement: A new feature created to expand the capabilities of the TrackIt Android app and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in the TrackIt Android app and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v14.4.52 (09/08/2020)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

Values added to the Load Properties card

(FEL-765)

The Current Volume and Current W/C Ratio (Water/Cement ratio) values were added to the Load Properties card for users of the Drum Rotation Sensor. This change will give drivers access to more real-time information from the Drum Rotation Sensor system.

Load Properties	
Volume (yd³)	Water (l)
7.0 Ticketed	7 Added
7.0 Current	0.55 Target W/C
	0.52 Current W/C
Drum Revolutions	
4.0 Drum RPM	
176.3 Total	
153.3 Charging	
0.0 Discharging	
Charging	

Display Over permission optimized

(FEL-1243)

The Display Over permission for OS10 devices has been changed to a suggested permission instead of a critical permission. Previously, drivers would get stuck on the login page because of the permission was set as critical.
