

# TrackIt<sup>®</sup>

Android

Version: 14.4.57

Release Notes

11/24/2020

**Command  
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the TrackIt Android product.

### Legend

**Enhancement:** A new feature created to expand the capabilities of the TrackIt Android app and increase its overall benefit for end users.

**Correction:** A change intended to remove unexpected behaviors in the TrackIt Android app and improve the overall end user experience.

**Process Steps:** Step-by-step instructions intended to complete a task associated with the enhancement or correction.

**Information:** General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

## v14.4.57 (11/24/2020)

### Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

---

#### ***TrackIt Android updated for third-party compatibility***

***(FEL-1572)***

TrackIt Android has been updated to be compatible with the new version of ISE eFleetSuite. Because of some recent changes to the ISE eFleetSuite application, TrackIt Android would behave unexpectedly during login and logout.

---

#### ***Location Disclosure message updated***

***(FEL-1925)***

The Location Disclosure message for TrackIt Android has been updated to read: "TrackIt collects location data in the background even while not in use, to enable auto-statusing and real-time map visibility for dispatch." To accept the disclosure and continue to the app, tap **OK**.

## Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt Android.

---

### ***Pre-Trip and Post-Trip Certifications not updating***

**(FEL-1474)**

#### **Corrected behavior:**

PREREQUISITE: This correction requires both TrackIt Android version 14.4.57+ and VisTracks custom build version 1.0.2015.201112.command.

The [DVIR](#) card for VisTracks customers now functions as intended to alter Pre- and Post-Trip Certifications and trigger [DVIR Pre-Trip](#) or [DVIR Post-Trip](#) alerts.

#### **Previous behavior:**

The DVIR card for customers with VisTracks did not change properly for the Pre- and Post-Trip Certification. This caused the alerts function associated with DVIR alerts to function incorrectly.
