Legend

Enhancement: A new feature created to expand the capabilities of the TrackIt Android app and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in the TrackIt Android app and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v14.4.61 (1/19/2021)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

Red Bar Alerts improved

(CA-448)

TrackIt Android will now show COMMANDassurance red bar alerts and engine alerts on top of other apps when TrackIt is in the background. The alert will go away when the alert conditions are no longer true or when drivers tap the red bar. Previously, these alerts would not display if TrackIt was in the background and another app was in the foreground. The content of the alerts can be configured on the [Custom Event Setup](#) page in the TrackIt Web Console.
