

# TrackIt<sup>®</sup>

## Web Console

Version: 14.4.64

Release Notes

3/2/2021

**Command  
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the TrackIt Android product.

### Legend

**Enhancement:** A new feature created to expand the capabilities of the TrackIt Android app and increase its overall benefit for end users.

**Correction:** A change intended to remove unexpected behaviors in the TrackIt Android app and improve the overall end user experience.

**Process Steps:** Step-by-step instructions intended to complete a task associated with the enhancement or correction.

**Information:** General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

# v14.4.64 (3/2/2021)

## Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

---

### *TrackIt Android app icon updated*

*(FEL-2061)*

The app icon for TrackIt Android has been updated for identification on devices. The new icon will help customers more readily associate TrackIt Android as a Command Alkon Incorporated product.

### *Status questions and status changes more accurately reported*

*(FEL-2660)*

When TrackIt Android is in the background of a tablet, status changes will still occur correctly and be reported at the actual status change time. Additionally, a [Status Question](#) sent with a status change will be displayed the next time TrackIt Android is in the foreground. An unanswered status question in the background will not prevent a status change from occurring or reporting at the correct time. As before, status change and status question timestamps are reported on the [Daily Breakdown](#) report.

---

### *Water Meter Installed setting in app settings*

*(FEL-2661)*

TrackIt Delivery Cycle Monitoring users can now indicate from TrackIt Android whether or not a vehicle has a water meter installed. After navigating to **Sensors Setup** from the **Settings** menu, tap the **Water Meter Installed** check box as part of your setup and tap **SUBMIT** when all data is input correctly. This page is only available to customers with either COMMANDassurance or TrackIt Delivery Cycle Monitoring licenses.
