Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v14.4.69 (05/18/2021)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

➕ *Washout Sensor installation field* *(TP1-86)*

A new Washout Sensor installation field was added to the Sensor Setup page in TrackIt Android. This field is intended for installers to use while setting up the TrackIt Delivery Cycle Monitoring assembly on customer sites.

➕ *Bluetooth connection status for COMMANDassurance* *(CA-582)*

For COMMANDassurance users, the TrackIt Web Console will now show the Bluetooth connection status on the **System Health Summary** report. Bluetooth connection status will appear under the Probe Communication health aspect to help users determine if the connection between the Sensor Link and vehicle tablet is functioning.

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt Android.

✅   *TrackIt Android not accessing internet upon initial login*   *(FEL-4074)*

Corrected behavior:

Upon initial login to TrackIt Android, the device will now be able to consistently access a valid internet connection.

Previous behavior:

At times, an initial login to TrackIt Android would result in the device hanging without finding a valid internet connection.
