Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v14.4.83 (12/28/2021)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

Create bundle artifacts for android applications (FEL-4516)
ESM, CA, TrackIt, 3P

Trackit now supports the new bundling file method required to be an application listed in the Google Playstore.

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt Android.

Data not matching between the Fuel Economy Summary Report and Fuel and Distance by Region Report (FEL-4783)

Corrected behavior:

Corrected a bug that was causing data from the Fuel and Distance by Region Report and the Fuel Economy Summary report to display significantly different data values. The issue was caused by situations where drivers were using the swap feature on vehicles and those trucks had large discrepancies in their data.

If you believe you are seeing this concern on past data, please the examples and reach out to TrackIt Support as we can work with our development team to correct those instances. The TrackIt application was corrected to prevent this from continuing to happen.

Previous behavior:

Fuel and Distance by Region Report and the Fuel Economy Summary report were displaying different data values.
