v14.4.87 (02/14/2022)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

FMVPP field to not allow for 0 or negative value *(TP1-2072)*

Added additional fail safe logic to the FMVPP field.

When the setting is 0 from the Android tablet, the user is prevented from submitting.

When the setting is 0 from web the user is prevented from submitting.

When the setting is empty on web the value should remain empty on the web.

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt Android.

stuff   *(FEL-5193)*

Corrected behavior:

Corrected an issue where on OS11+ devices a message was displaying to users that webview was not current when in fact is was.

Previous behavior:

OS11+ tablets were displaying out of date webview message
