Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v14.4.90 (04/07/2022)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

➕ *Audible alert on tablet when truck is ticketed*   *(DEL-14)*

To enable this new feature, please head to Site Settings and under the TrackIt Device Settings page, you will see a new line for "Sound when a ticket is activated". There is a capability for you to select and preview which audible alert you would like for your drivers. Once set, changes will require a log out and back into the tablet.

➕ *Capability to disable 'Find Truck' on driver tablets*　　*(DEL-14)*

To enable this new feature, please head to Site Settings and under the TrackIt Device Settings page, you will see a new line for "Enable Find Truck". To disable, set this field to 'False'. Once set, changes will require a log out and back into the tablet.

➕ *Background handling improvements*　　*(TP1-2215)*

Updated the logic on the tablet to better handle when the Android OS manages tablet resources to maintain its connection in the background rather than disrupting the driver screen.

➕ *Additional EDC logging around disconnection and*　　*(DEL-48)*
reconnection attempts

Added additional logging in the application to include additional data values for debugging around the EDC disconnection and reconnection attempts.
