Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

INTERNAL ONLY

v1.0.103.0 (05/12/2020)

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

***"Actions enabled for Ticket
Integration" setting not saving***

(NFS-1740)

Corrected behavior:

TrackItWare has been updated to now properly save and remember the "None" value for the "Actions enabled for Ticket Integration" setting. Switching the setting to "None" allows TrackItWare to perform all functions except reading trip packets to import tickets or status changes to TrackIt.

Previous behavior:

The setting "Actions enabled for Ticket Integration" would not save and remember the "None" value.
