v1.0.105 (11/24/2020)

> ⚠️ **PREQUISITE**: .NET FRAMEWORK 4.8 is required to upgrade to this new version of TrackItWare.

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

✅ ***Tickets from integration missing values***   *(FEL-1838)*

Corrected behavior:

TrackItWare now allows for the Origin Plant value on tickets received from Jonel ticket integration. This means TrackItWare sends the correct Origin Plant values to the **Batch Summary** report.

Previous behavior:

Tickets received from Jonel ticket integration in TrackItWare were not assigned the Origin Plant value. When TrackItWare sent this information to TrackIt, the Batch Summary report did not process these tickets correctly because of the missing value.
