# v1.0.106 (2/2/2021)

## Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

---

### *Tickets from integration missing values*

(CA-466)

#### **Corrected behavior:**

TrackItWare now retains the **None** value for the **Actions enabled for Ticket Integration** setting. This correction allows TrackItWare to perform all functions while still forgoing reading Trip Packets to import tickets or status changes to TrackIt.

#### **Previous behavior:**

The setting **Actions enabled for Ticket Integration** would not save and retain the **None** value. This prevented TrackItWare from performing certain functions as desired.
