

TrackIt®

TrackItWare

Version: 1.0.112.0

Release Notes

10/01/2021

**Command
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the product.

Legend

Enhancement: A new feature created to expand the capabilities of TrackItWare and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in TrackItWare and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v1.0.112 (10/01/2021)

Send Return Volume of zero to iNTEGRA when no return concrete (CA-725)

For COMMANDassurance customers, when the return volume changed to zero, TrackItWare would not send the return volume of zero to the iNTEGRA or COMMANDseries.

TrackItWare will now send a return volume of zero to both iNTEGRA and COMMANDseries so that the vehicle's volume can go to zero after the driver dumps the leftover concrete.
