

TrackIt®

TrackItWare

Version: 1.0.99

Release Notes

07/02/2019

**Command
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the product.

Legend

Enhancement: A new feature created to expand the capabilities of TrackItWare and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in TrackItWare and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

Enhancements

The following item is a newly-implemented feature intended to increase end-user productivity between the services TrackItWare communicates.

TrackItWare imports carrier information from Integra (NFS-437)

To allow TrackIt 3P and Integra to work together, TrackItWare has been enhanced to import the **Carrier ID** and **Carrier Name** from Integra to the TrackIt Web Console. If the Integra trip packet is for a third-party hauler, the TrackIt Web Console can then use the carrier information to assign the ticket to third-party vehicles that are using TrackIt 3P.
