Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the product.

Legend

Enhancement: A new feature created to expand the capabilities of the TrackIt Web Console and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in the TrackIt Web Console and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v3.0.67 (7/7/2021)

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

Reports erroneously requiring certain fields

(FEL-4225)

Corrected behavior:

The `EmployeeNum` and `VehicleNum` fields are not required to generate specific reports.

Previous behavior:

Previously, API queries treated `EmployeeNum` and `VehicleNum` as required fields to generate specific reports.
