

# TrackIt<sup>®</sup>

## Web Console

Version: 3.0.68

Release Notes

07/19/2021

**Command  
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the product.

## Legend

**Enhancement:** A new feature created to expand the capabilities of the TrackIt Web Console and increase its overall benefit for end users.

**Correction:** A change intended to remove unexpected behaviors in the TrackIt Web Console and improve the overall end user experience.

**Process Steps:** Step-by-step instructions intended to complete a task associated with the enhancement or correction.

**Information:** General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

# v3.0.68 (7/21/2021)

## Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

***Product Delivery Amount (Cumulative Qty) now available from COMMANDseries (FEL-4642)***

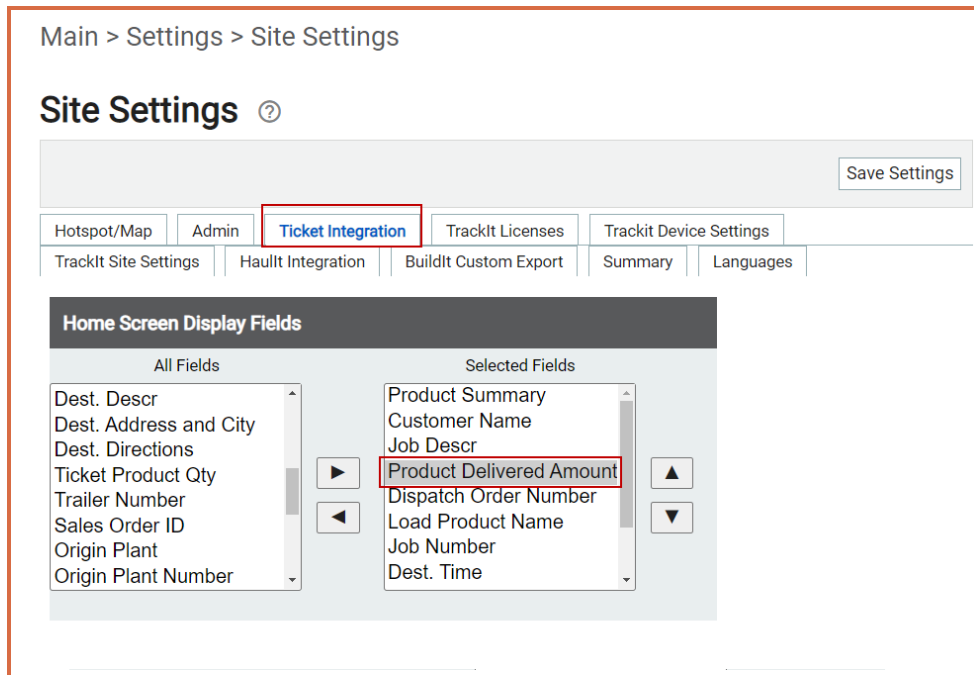

***This enhancement originated from the [Idea Portal](#).***

TrackItWare Version 1.0.110 and TrackIt Web version 3.0.68 are required to implement this enhancement.

A new **Product Delivery Amount** field is available to allow the delivered quantity of an order from COMMANDseries to display on the ticket card on the tablet for the driver to have access to that additional information at the job site. In order to configure this field to display on the ticket card, the **Product Delivery Amount** field must be added to the first four fields selected for Home Screen Display Fields in Site Settings under the Ticket Integration tab.

## Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

***Wrong error icon displayed in  
Batch Summary Report***

***(CA-689)***

### **Corrected behavior:**

Now, the correct error icon is displayed in the Batch Summary Report.

### **Previous behavior:**

Previously, on the Batch Summary Report, the Driver Error icon was displayed instead of the Data Error icon in cases where the driver slowed down and handled load appropriately.

### ***Error message corrected in Equipment for duplicate VIN numbers*** ***(FEL-4464)***

#### **Corrected behavior:**

Now if a duplicate VIN number is entered in the Edit Equipment form, the error message clearly communicates this and identifies the truck on the equipment list that already has the entered VIN number.

#### **Previous behavior:**

Previously, if a duplicate VIN number was entered in the Edit Equipment form the displayed error message did not communicate the issue clearly.
