Enhancement: A new feature created to expand the capabilities of the TrackIt Web Console and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in the TrackIt Web Console and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v3.0.72 (09/15/2021)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

✅ *MapIt destination resetting* *(FEL-4818)*

Corrected behavior:

Re-mapping an order does not affect the destination value.

Previous behavior:

Re-mapping an order would change the destination to match the origin.

✅ *Auto log-out not respected* *(FEL-4852)*

Corrected behavior:

Drivers are now always logged out automatically when their Max Login Time is exceeded.

Previous behavior:

At times, drivers were not being automatically logged out despite exceeding their Max Login Time configuration.

✅ *Delivery Qty field displaying 0 value* *(FEL-4867)*

Corrected behavior:

The Delivery Qty value on the ticket card now only reflects the primary product.

Previous behavior:

Zero values were displayed as the Delivery Qty on the ticket card due to additional non-primary products.
