10/20/2021

**Command
Alkon**

These release notes contain information regarding new functionalities, behaviors, changes, and other new experiences you should expect when using this latest version of the product.

Legend

Enhancement: A new feature created to expand the capabilities of the TrackIt Web Console and increase its overall benefit for end users.

Correction: A change intended to remove unexpected behaviors in the TrackIt Web Console and improve the overall end user experience.

Process Steps: Step-by-step instructions intended to complete a task associated with the enhancement or correction.

Information: General information needed to understand the context, behaviors, and restrictions associated with new enhancements and corrections.

v3.0.74 (10/20/2021)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

Product Ordered Amount and Product Usage Type (FEL-4842) ***now available from COMMANDseries***

NOTE: TrackItWare Version 1.0.113 and TrackIt Web version 3.0.74 are required to implement this enhancement. Query updates within TrackItWare are also needed.

Two new fields (Product Ordered Amount and Product Usage Type) are now available to pull order information from COMMANDseries to display on the tablet ticket card for the driver to access that additional information at the job site. In order to configure this field to display on the ticket card, they must be added for Home Screen Display Fields in Site Settings under the Ticket Integration tab.
