v3.0.76 (12/08/2021)

Enhancements

The following items are newly-implemented features intended to increase end-user productivity throughout TrackIt.

Add Weight Comp Completed Flag to Custom Engine Event List **(CA-679)**

A new field has been added to track whether or not the Weight Compensation Diagnostic check has been completed. This new field has been added to the Custom Engine Event list of fields used in Engine Diagnostics. It will be available to help trigger status changes and show messages to drivers.

Corrections

The following tickets are improvements upon unexpected user experiences for a more fluid and productive experience throughout TrackIt.

***Text Centering and Font Size on 'No Data'
in widgets******(TP1-1346)*****Corrected behavior:**

Corrected a bug on the widgets to display the 'No Data' message in the center of the widgets uniformly.

Previous behavior:

The 'No Data' message in the widgets did not display uniformly.

***Load Properties Graph - Missing Icons and
Status on Hover******(CA-781)*****Corrected behavior:**

A recent update to the Load Properties screen caused an issue where the it would not show status changes if the hover information. This has been fixed to show the status in the mouse hover.

Previous behavior:

The status changes were not appearing in the hover information.
